

Providing a Secure and Productive Remote Work Experience

Just like working from the office

Tetherfi Secure Work from Home solves some of the most critical challenges associated with remote work. Powered by Tetherfi's leading AI technology, our data-loss prevention platform safeguards your customer data, increases compliance with security policies, and protects agent privacy.

Protect Customer Data

Ensure Employee Compliance

Manage Employee Privacy

Increase Employee Engagement

Employee - Supervisor collaboration

Deliver Consistent CX

Tetherfi Secure Work From Home In Action

1

Employees start their day using **Facial Biometrics** to log into their secure data apps

2

Continuous Authentication with AI Models detects a missing employee or unauthorized people or objects (eg, mobile phone)

3

AI Platform takes action and blocks or locks the employee's device to protect customer data

4

Supervisor alerted with event details to take further action to coach the employee

Getting Started: Fast and Frictionless

No risk, more value
Added safeguard to protect customer data and employee privacy

Configure, not customize
Shipped with pre-built features that require minimal configuration

Co-exist with your current IT infrastructure
Get started with an out of the box Proof of Concept in just a few days
